**Group Art Unit: 3643**

AMENDMENTS TO THE SPECIFICATION

In the specification, page 4, line 17 after "configured" insert: with an enlarged radius,  
as indicated below:

The crank segment 42 of the screw crank 38 extends from the abutment 40 to an intermediate arcuate bend 44 configured with an enlarged radius to provide an anvil 46 in axial alignment with the crank segment 42 and screw 36. A hammer thus may be impacted against the anvil 46 to drive the screw 36 into the side of a Christmas tree C a short distance to set the screw into the tree.
